

The New Planet

by Yanna Wilson

NASA (the world famous space agency) had just created the most powerful telescope in the world and they saw something incredible. A new planet!

Now NASA was wondering if they should send their robot Bob. He was an extremely realistic robot that literally had super powers. He was created as a security gadget and was made in 2084, 1 year ago.

Bob was a high piece of technology that could withstand a lot (e.g. –a lightning strike) he was also able to think and feel emotions. He was a boy (as his name says) and some people even mistake him for a real person. Now, his super powers: Bob was the first robot that had invisibility but only for a few minutes, he was also able to shoot bullets because he had an installed gun in his arm and at least 500 bullets in his arm.

Bob landed safely on the planet, now named planet Dodo and it was incredible. The NASA people also saw it thanks to the robo-camera. It was a water planet, no one had ever seen anything that beautiful. It had water, animals, trees and grass - it was unbelievable. There were pink dolphins and blue dogs. There were also crystal trees and little blades of crystal as grass. It was like a dream! They noticed that the air was perfect for any human to live in but there was no one to be seen. *That* was a mystery to solve.

Then, suddenly, the robo-camera went out and the connection to Bob was lost.

10 years later

One day a group of teenagers were walking down a path, when they saw an advertisement to go to a planet called planet Dodo. They thought they wanted to go so they signed up for it. Next week they got the letter saying they could do it.

They were a group of 6 (all aged 15).

- First was Luke, he was the most popular guy in school but he never left his group.
- Then was Milly, she was a shy girl that was easily hurt and led by her emotions.
- Next was Elisabeth (Ellie for short), Ellie was the sassiest person ever. Her family was rich so she was also quiet spoiled.
- 4th was Georgia a real tomboy, she was super strong and had a crush on Luke and knew he had a crush on her.
- Next was Lucas, he was an “I have everything” guy, he always showed off his newest stuff.
- Finally the last person was Daniel, he was an animal crazy guy, he had 20 pets: some exotic like snakes, lizards and even tarantulas

They set off to the planet and were so excited to land and take pictures. It was like a once in a lifetime holiday for them.

When they arrived they immediately went out and when they did they thought that they would never see anything that beautiful ever again! They noticed a particular little fella, a puppy barking at something. It was a robot or a human, they weren't sure. They noticed that they could turn it on, so they did. It turned out to be Bob, the robot! At least that is what he said when he became alive. Bob warned the teens that the rocket would shut down, just like it happened to him 10 years ago. The teens sprinted to the rocket, but they were too late. The rocket door was locked and there was no way to get in and away from the planet. They were stranded...

Bob eventually caught up with the teens and said he would help them if they became his friends, because he had been extremely lonely for the past 10 years. The teens agreed as they liked him anyway. So, they got to work on the rocket. After a whole day of trying, they gave up. The next day started again with new energy, but as it was still not working, they decided to have a rest and play in the crystal waters. The following weeks and months were the same: they tried hard every day but couldn't get the rocket going. Bob was happy that he had friends and they were working together. This went on for a year until they eventually found a way to get the rocket going!

Just when they were ready to step into the rocket, they noticed another problem: there was only space for 6 people to fit. Everybody went quiet. What were they going to do? They searched in the rocket to find an extra seat, but all they found was a storage cupboard. Bob fitted in there luckily and he went to sleep for the whole journey, with his friends, finally on his way home.

The End
