Focus Learning - Adding Fractions - Q11 - Q15

When Two Fractions Have the Same Denominator

If the two fractions in the calculation have the same denominator, the denominator will stay the same.

Then all you need to do is simply add or subtract the numerators to find the sum of the fractions.

$$\frac{2}{5} + \frac{1}{5} = \frac{3}{5}$$

$$\frac{4}{8} - \frac{2}{8} = \frac{2}{8}$$
