

Match the Pronoun with Its Noun

In the following paragraph, there are lots of pronouns. Can you circle them all?

Chocolate first came from Central America. It was originally called Xocolatl. When Spanish explorers travelled to the New World, they found many unknown foods there. These were brought back as gifts for their kings and queens. In 1847, Joseph Fry made the first chocolate bar, which he called 'Chocolate Cream'. British people must love chocolate, because on average we eat about 8.5kg each every year, which could make us very fat!

Now find the noun or noun phrase each pronoun belongs to. Write them as a pair, like this:

'it' = chocolate
