

Tuesday – Mr Jennings' group

1)

Can you write the missing numerators?

$$\frac{\quad}{60} + \frac{40}{60} = \frac{51}{60}$$

$$\frac{33}{116} + \frac{\quad}{116} = \frac{115}{116}$$

$$\frac{\quad}{329} - \frac{95}{329} = \frac{209}{329}$$

$$\frac{326}{480} - \frac{\quad}{480} = \frac{148}{480}$$

2)

Complete the part-whole models

Complete these part-whole models using a different numerator in each bubble.

The bottom 3 part-whole models show example answers. However you may have used different numbers.

3)

Complete the following:

$$\frac{\quad}{\quad}$$

$$\frac{\quad}{\quad}$$

$$\frac{65}{93}$$

$$\frac{52}{93}$$

$$\frac{\quad}{\quad}$$

$$\frac{26}{93}$$

$$\frac{\quad}{\quad}$$

4)

Follow the rule above each arrow to complete the fractions from start to finish.

ANSWERS

Can you write the missing numerators?

$$\frac{\mathbf{11}}{60} + \frac{40}{60} = \frac{51}{60}$$

$$\frac{33}{116} + \frac{\mathbf{82}}{116} = \frac{115}{116}$$

$$\frac{\mathbf{304}}{329} - \frac{95}{329} = \frac{209}{329}$$

$$\frac{326}{480} - \frac{\mathbf{178}}{480} = \frac{148}{480}$$

Complete the part-whole models

Complete these part-whole models using a different numerator in each bubble.

The bottom 3 part-whole models show example answers. However you may have used different numbers.

Complete the following:

$$\frac{91}{93}$$

$$\frac{78}{93}$$

$$\frac{65}{93}$$

$$\frac{52}{93}$$

$$\frac{39}{93}$$

$$\frac{26}{93}$$

$$\frac{13}{93}$$

Follow the rule above each arrow to complete the fractions from start to finish.
